

KID PIX Deluxe 4.1

Riverdeep Ireland

Ages 4 - 12

Version 4.1 of Kid Pix, released in Australia in September 2008, is the latest version of the world's top selling creativity tool for children. You can use Kid Pix to draw pictures, make animated stories, add sound and incorporate digital photos or scanned images. Kid Pix is widely used for artistic expression and digital story telling across the primary years.

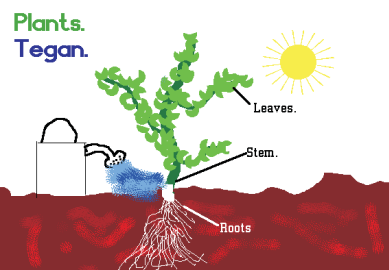

Why this creative tool?

-  A large resource bank of background images, characters and animations make digital story-telling easy.
-  Kid Pix 4.1 includes a "Small Kids Mode" ideal for children in pre-school and prep.
-  The wide range of painting tools and child friendly interface make Kid Pix 4.1 the program of choice for primary schools around the world.

What do creative schools do with Kid Pix?

-  Use Kid Pix in ICT to introduce children to graphic design using a PC.
-  Design and publish stories for the school website with pictures, animations and sound effects.
-  Use digital photos, scanned drawings and digital paintings to tell the story of a class camp or excursions.

"My favourite part of Kid Pix is when we make a slide show and I can hear my voice and see my video in it and we show it to the class."
